## GameMaker 8.1 (No Crack Needed) Free Download

A: You can't. See this question which also addresses why you can't get a discount with the "Humble Bundle" (and similar) programs. A: Update: GMS 1.6.2 (which is what your question is actually about) is free now. From their website: Today, GameMaker Studio is officially free to all users. All features are available in the standard version. This is why you are not getting a discount when you download from other sites (your old version was the premium version, the one that was offered as a free download for a limited time). This is also why there are no discounts with the Humble Bundle or similar. Official page Q: Connect to Sql Server 2000 from Mono in Linux I am doing a project in C# and as I need to connect to a MSSQL Server 2000 (the main server which hold all the project data) I use Mono (Ubuntu) for the development. I tried both Oracle and Microsoft drivers but both of them always throw exception:  
Oracle.DataAccess.Client.OracleException (0x80004005): could not load Oracle Shared Packages  
System.Data.OracleClient.OracleException (0x80004005): No Oracle client libraries were found. and  
Microsoft.Data.SqlClient.SqlException: An OLE DB error has occurred. I've also set all the required DLLs to the /usr/lib/mono/2.10 directory and even manually set the ORACLE\_HOME variable but it still did not work. I've also read about 10 different blogs of people with the same problem but no solution was found. A: Took me a while to figure this out. What I did was: Install the latest version of Oracle Client Ubuntu 12.04: Install libaio1 libaio1-dev libaio1-dbg libaio-dev libaio1-doc Debian 6.0: Install libaio1 libaio1-dev libaio1-doc Arch Linux: Install libaio1 libaio1-dbg libaio1-dev libaio1-doc Download and install MS Drivers for ODBC Ubuntu 12.04: Install mono-complete-dbg1
