Will the world be ready for a monster summer? Watch the new TV spot! There are so many in the resort now that Dracula has to hire exterminators to deal with them. The exterminators want to build a giant scary castle to keep them all out of the main house, but Dracula is determined to avoid that fate! The boys continue their bromance in a live action sequence with Ed and Ron. In reality, these 3 boys have much more in common than their adorable displays of friendship in the animated film. During a round of spin the bottle, the boys each kiss the person their bottle lands on, with a special date in mind. As the boys prepare for their summer vacation, they compete in a video game tournament on their phone, The winner of the tournament will get to visit the resort in the summer! They play for the chance to win the resort for the summer, but a bit of problem occurs when their friend Silas thinks the boys are cheating and has the resort pad locked! As the boys travel on their buggy to the resort, they encounter a little monster who is about to have a rough time! They pull up to a stop sign, a giant monster tries to block their way and they have no choice but to confront the monster! They plan to take the monster out, but things don't go quite as planned. After trying to find a way out of the monster infested forest, the boys come across some strange monsters and they accidentally capture some of them! They're going to find a way out of this forest, even if they have to put the safety of the kids first. Count Dracula is a popular character in the vampire genre, but there are people who feel he doesn't deserve a movie. It seems like all you need is to look at Dracula's history, before the legend, to understand how he's been portrayed. As the Bonsai trees are being moved, a sassy stepmom arrives with her cute, little boy who happens to look like Count Dracula! She claims he's in danger and the family is the only way to save him. Can the family stop the evil Casanova before he turns the boy into a vampire? Find out in Hotel Transylvania 2! When a group of young monster kids wander into the world, they soon discover that not only can you be bitten by a monster, but you can be turned into a monster too! Together, they must break the spell before it turns their sweet

Hotel Transylvania 3: Summer Vacation is an animated comedy movie with count Dracula as one of the protagonists. I have a custom activity, where I do a simple conditional check (validation rule) using the data on the row, and depending on the result, I increment the value of a function field. However, the function field only contains numbers, and if I enter a letter in the function field, it doesn't get incremented. Does anyone know a way around this? A: Assuming you're using a classic workflow, you should be able to use any Apex logic to accomplish this. If you're using a workflow rule or process builder, you can use the execute method of the Process Builder to call your apex method. public class ApexWorkflow { public static void StartWorkflow(Id recordId) { Id myVar = recordId; myVar.SomeField__c = myVar.SomeField__c + 1; System.debug('New value of'+ myVar.SomeField__c + 'is'+ myVar.SomeField__c); } } You can call it via a process builder like this: Id myVar = recordId; String myVarField = myVar.SomeField__c; String myVarValue = myVarField.Substring(myVarField.indexOf('(') + 1); ApexWorkflow.StartWorkflow(myVar); myVarField = myVarValue; At the end of the day, you could also just use the standard formula builder to increment the value of your field.
