Paste the code, the challenge code (which you got when downloaded the program) . Paste it in the text box, tick the box that says "Challenge code" and tick the box that says "Copy challenge code" . Install the software, wait until the installation is completed (If you have any problem please restart the software and check it again . If you have any problem after that, please contact the technical support (Support tab) . To activate the software, you must be in the "Challenge code" tab and paste the challenge code (Which you have already got during the installation) . Click "Apply" . If the "Challenge code" has been successfully applied (You can check it from the "Details" tab), you can unlock the program and continue to use it . After that, try to open the software and see the different features. . Notes: The challenge code is easy to crack. Use the crack at your own risk. Category: Software Category: MusicNovel Cdc42 mutations and MKK-2 in Chinese patients with sporadic focal dermal hypoplasia. Focal dermal hypoplasia (FDH) is a congenital disorder characterized by the partial or complete absence of the skin and subcutaneous tissues. Mutations in the Cdc42 gene have been reported in patients with autosomal dominant generalized FDH and autosomal recessive caspase recruitment domain 15 (CARD15) or pyrin domain containing 3 (PYDC3) mutations have been described in patients with autosomal recessive localized FDH. We studied a consanguineous Chinese family and four sporadic Chinese patients with mild generalized FDH, and identified two novel mutations in the Cdc42 gene. One mutation (c.742C>A) was present in the mother and another mutation (c.742G>A) was present in the father and patient 1, patient 2, patient 3 and patient 4. The mutation in c.742G>A results in the substitution of alanine to valine at position 247. The frameshift mutation (c.742C>T) causes a premature termination codon in codon 247 (p.A247X). Both mutations were located in the GTPase binding domain of Cdc42. The maternal mutation (c.742C>A) was also present in the 2d92ce491b
