With KEYMACRO you can easily create keyboard shortcuts for you... Download KEYMACRO 2.6.1 KEYMACRO Description: With KEYMACRO you can easily create keyboard shortcuts for you... KEYMACRO 2.6.1 Free Download KEYMACRO Overview KEYMACRO is a program that allows you to create keyboard shortcuts for you. No need to go to the Keyboard Shortcuts tab of the Options menu and type the exact keyboard shortcuts for you to use. You can use Keymacro to generate keyboard shortcuts for you and change the keyboard shortcuts you already have as well. As you can see, if you had installed the program, it would have automatically added the shortcut to the Options menu. But, in this case, you can add your own shortcuts by selecting the Keyboard Shortcuts tab. You can create keyboard shortcuts for every tab of your program by using Keymacro. For example, you can make the Back Button, the Quit button, the Tabs Button, the Spell Checker, the Options tab, the Help tab, and so on. The very important and the most practical example is the Help Tab. If you want to add more, simply right-click on the tab and select "Add Keyboard Shortcut" from the popup menu. You can select the Keyboard Layout that you want to use and you can even make the keyboard shortcut appear in a panel bar that is placed on the left side of the screen. This helps you to save a lot of space on your desktop. A great benefit of using Keymacro is that you can give your program's shortcut shortcuts different keys. Just double-click the keyboard shortcut and select the KeyPress from the popup menu. You can also assign different options to the different keys of your shortcut. For example, if you assign Shift+O to the "Open the Tab" menu option, this key combination opens the tab you selected and opens the menu. The best part is that you can also edit your created keyboard shortcuts right away. Just double-click the shortcut and you can edit it as you like. You can even remove the shortcut if you no longer need it. How to Start Using Keymacro 2.6.1 With Keymacro, you can create a keyboard shortcut for every tab of your program by using the Keyboard Shortcuts tab. Just right-click on the tab and select "Add 1d6a3396d6
