Netsupport School 12.0, software version 3.22, is a Windows software program developed by NetSupport Software. Upon installing and running the program, it creates a shortcut on the desktop, which makes it an easy-to-use program for beginners. The setup package is about 8.53 MB (884442 bytes) when downloaded. Q: Join only 2 tables with a list of values I have 2 tables, which have a common ID column. First Table is : ID, TABLE1 Second Table is : ID, TABLE2 Let's say I have a list of some values(ID's), and I want to join these tables according to these ID's, if a value is found, then join it. For example: ID TABLE1 TABLE2 1 A NULL 2 NULL B 3 NULL NULL 4 NULL NULL 5 NULL NULL 6 NULL NULL 7 NULL C 8 NULL NULL 9 NULL D The result I am trying to achieve is: ID TABLE1 TABLE2 1 A B 2 NULL B 3 NULL C 4 NULL D 5 NULL NULL 6 NULL NULL 7 NULL NULL 8 NULL NULL 9 NULL NULL A: I would use not exists: select t1.id, t1.table1, (select top 1 t2.table2 from table2 t2 where t1.id = t2.id) as table2 from table1 t1 where not exists (select 1 from table2 t2 where t2.id = t1.id); 4bc0debe42
