
StampThemes Activation Code Download

----- The StampThemes application was designed to be a small utility that let you mark an application as 'Windows XP Themes' compliant. By doing this old applications which do not have the XP style will have the XP style! StampThemes can also be used to remove the XP style from an application. V1.0 ----- Features: ----- This application is designed to work only on Windows XP applications. The Windows XPThemes style has been removed from the application. This application creates a file named 'WindowStyles.ini' which contains the style information. This application removes the WindowStyles.ini file. This application will recursively search for all files (stored in 'C:\Windows\win.ini') that have Windows XPThemes compliant style information (style information for the file (or files) is stored in the [Style] section of the file (or files). This file (or files) is used to determine if the file (or files) is Windows XPThemes compliant. If an application does not have the Windows XPThemes compliant style information, this application will remove the WindowStyles.ini file. If an application has the Windows XPThemes compliant style information, this application will leave the WindowStyles.ini file alone. Notes: ----- This application creates the WindowStyles.ini file in the same location as the application. The name of the file is based on the name of the application (eg. WIN.INI) and the .ini file is located in the same directory as the application and the window styles information is located. If the application is located on a network server, the user will need access to the application in order for the application to create the WindowStyles.ini file. This application is only for Windows XPThemes compliant applications (The applications must be compliant with Windows XPThemes). The application is not 'COM compliant'. File Information ----- Created by: ----- This application was created by: Documentation is available on: ----- SUMMARY ----- This utility was used to create the 'Windows XPThemes' style. License Information ----- This application is provided as is. The author cannot answer technical support questions. The files that this application creates can be located in:
