With Cracked Code. Sierra Embroidery Office Design V9.02 Checked.... Citations External links JET SET SOFTWARE

Category:Embroidery softwareQ: How to convert a list of nested dictionaries to CSV? I'm new to Python and I was wondering how you would convert a list of dictionaries that looks like this: `my_list = [{"name": "first", "id": "1", "fields": [{"a": "val1"}, {"a": "val2"}, {"a": "val3"}]}, {"name": "second", "id": "2", "fields": [{"b": "val1"}, {"b": "val2"}, {"b": "val3"}]}]` into a CSV file that looks like this: `name,id,a,b first,1,val1,val2,val3 second,2,val1,val2,val3` I know how to do this with a single dictionary, but I don't know how to deal with nested dictionaries and lists Thanks A: Try this: `my_list = [{"name": "first", "id": "1", "fields": [{"a": "val1"}, {"a": "val2"}, {"a": "val3"}]}, {"name": "second", "id": "2", "fields": [{"b": "val1"}, {"b": "val2"}, {"b": "val3"}]}]` for i in my_list: name,id,a,b = [i['name'],i['id'],i['fields'][0]['a'],i['fields'][1]['b']] print(name,id,a,b)
