KeyMacro is a program that allows you to easily record your own keyboard macros and run them later. What is a Macro? Macros are a set of sequential commands that can be performed on the mouse or keyboard with a single click. They're very helpful for repetitive tasks. If you want to change the position of a shape or change the font size every time you open a document, you can set a macro to do it automatically. KeyMacro makes this a breeze by allowing you to record macros on any window, both at runtime or when the window is minimized, using both the mouse and keyboard. You can also run macros that have been recorded using either the mouse or keyboard. KeyMacro has the following key features: ☐ Newbie friendly - easy to use ☐ Works with any window ☐ Includes a built-in auto-save feature ☐ Can record both mouse and keyboard macros ☐ Can start or stop macros ☐ Support the following Windows: Explorer, File Manager, Notepad, PowerPoint, Outlook, Excel, Access, etc. ☐ Fast and small ☐ Includes a help file that can be accessed from the menu bar ☐ Completely FREE In addition, KeyMacro also provides advanced features like: ☐ KeyMacro Pro - a Professional version of KeyMacro with more advanced features like support for more Windows versions, support for multiple languages, advanced editing tools, etc.
