Live Email Autoresponder Crack+ License Key

Live Email Autoresponder is an email marketing software which is designed to create customizable email campaigns and send them with an infinite loop. You are able to send emails for as many times as you want to clients and to your subscribers. This solution allows to send unlimited Emails even if they fail. Many useful functions are available. Thanks to the highly customizable templates you can easily edit any email template of any text and HTML editor. You can easily load external text files into email editor. In addition to external files you can add your own HTML documents into your email template. One of the greatest advantages of Live Email Autoresponder is that you can use any text or HTML editor of your choice, your own document templates and any text or HTML editor. Moreover you are allowed to add additional emails and send them to clients and subscribers. Features: Email wizard Live Autoresponder contains a wizard which allows you to create an email campaign with the following options: - Template template, - Text, - Subject - From address - From name - Body - Body text - Send emails to specific address - Specific subscriber group, - Time period and loop time, - Delivery method and mail account, - Delivery interval and Repeatability, - List of processing tags, - Sending of the email in different formats, - Mail account settings, - Send multiple emails to the same recipient, - Send an automatic email at the end of the loop, - Minimum interval between emails, - Stop repeating at the end of the loop. Campaign Designer You can choose a template or start creating a new campaign. The wizard shows you a list of available email templates, editors and fields. You are able to edit your templates. You are also able to load text files into the template editor or insert HTML text editor. In addition you can insert your own HTML text editor, configure the fields with emails, contacts or subscribers etc. Campaign Builder After you have built a campaign with the Campaign Designer you can start with the Campaign Builder. This is where you can modify the settings for the mail account settings, delivery method, repeatability, time, interval, filter, etc. These settings determine when the autoresponder sends emails to clients and to your subscribers. Recipients Editor The Recipients Editor allows you to select recipients from a selected list, add a new recipient to the list and sort the recipients by name. List Editor The List Editor allows you to add an unlimited number of recipients and configure the senders, filters, and
