Gnostice PDFOne.NET is a component library that provides development tools for designing and producing PDF based applications using the .NET Framework. This component library supports developers to easily create applications that can view, print, create, edit, enhance, secure, merge, split and display PDF documents and forms. It also provides comprehensive controls for the most commonly used functionality. Gnostice PDFOne.NET is compatible with Windows 2000, XP, 2003 and Windows Vista and is a 100% .NET component library for .NET developers. It comes with hundreds of functions and properties that can be used to manipulate PDF documents in various ways and display documents in different formats. PDFOne.NET provides controls that you can place on your form and use the extensive set of methods, properties and events to quickly and efficiently customize the PDF task being performed. PDFOne.NET provides a high performance multipage viewer component with the ability to render most of the text and image formats, without requiring the installation of Adobe's products. It also provides a printer component to print PDF documents through your applications. A new bookmarks component allows you to display PDF bookmarks and provide PDF navigational features within your applications. PDFOne.NET also supports creation of new PDF documents, manipulation of existing PDF documents, reading and filling of PDF forms, compressing, securing, appending and merging of multiple PDF documents, stamping, building Table of Contents, setting bookmarks, and many more functions that can be performed on PDF documents. The created or manipulated PDF documents can then be automatically delivered directly to users' web browsers or saved to disk.
