Visual PHP Administrator (VPA) is a php script editor and php web development environment for hosting ASP, PHP, ASP.NET, Perl, Python, Perl CGI, and Ruby applications. VPA is a GUI tool that lets you edit php scripts and web pages without using a command prompt. The program lets you edit and test php scripts or web pages quickly. It allows you to check the complete status of your php server, and also allows you to change most settings, such as the name of your server, the ip address, and the port number. It is designed to make it easy for new php developers to start working with php from the start. The program is easily modifiable, by saving php scripts and web pages in an xml format. This makes it easy for php developers to use your saved php scripts and web pages as your own php scripts and web pages. You can also use the edited php scripts and web pages to create your own php scripts and web pages. Main features: - PHP editor and test script execution environment - PHP scripts and web pages saved in an xml format - Edit PHP scripts and web pages easily - Data from command line including php and html files - Built in FTP tool - Start and stop apache service - Integrated Windows hosts file editor - Built in editor to change settings easily - Integrated PHP development toolbox - Integrated webservers and page builder - Integrated SQL database management toolbox - Integrated memcache, memcached, and redis database management toolbox - Integrated MySQL management toolbox - Integrated MySQL database Chrome Extension Store (Best Selling) Best Selling 3.5 18,897 users Recent update: Free version Available Description: The Chrome Extension Store (version 1.0.1) is a free extension for Google Chrome that lets you manage and download extensions from the Chrome Web Store. It is designed to let you browse extensions and install them on your Google Chrome web browser. All extensions in the Chrome Web Store can be downloaded and installed by means of this extension, which enables you to view, sort, filter and download all extensions from the Chrome Web Store on one page. The extension is compatible with Google Chrome 7.0, 7.1, 8.0 and 8.1. Chrome Extension Store: Start looking for the extension in the Chrome Web Store. You can find extensions for the Chrome web browser at the official Chrome Web

Ingham Community Learning Center is a place for students, parents and community members to learn and have fun together! Our center serves students from pre-K through High School and has programs for all ages and abilities. Ingham Community Learning Center provides: Bundle Office (BC Office) is a free and easy-to-use bundle office suite. It is perfect for the offices that are migrating from MS Office to Google Drive or any other cloud service such as Microsoft OneDrive, Dropbox, Google Drive, Nextcloud, Z-drive, etc. Most of the applications included in this bundle suite are already integrated in Google Drive, but we have made a few adjustments to add a bit more functionality. CloudyDock is a free cloud-based application launcher, designed to run Windows applications in the cloud instead of on your computer. It will be easy to find the applications you want, launch them, and dismiss them all. You can define as many shortcuts for the cloud apps as you like, and easily switch between them by using hotkeys. You can also make a screenshot of any app running in the cloud, and upload it directly into a cloud storage service. Features - Cloud apps: You can define the cloud apps you want to run, and manage them easily. - Hotkeys: You can launch any app by pressing one of the hotkeys, so it is not necessary to remember all the command line for each app. - Built-in screenshot tool: You can quickly take a screenshot of any cloud app by pressing the PrtScn hotkey. - Cloud storage: You can upload the screenshot to Google Drive, OneDrive, Google+ Hangouts or any other cloud storage service. - Windows File Explorer integration: You can select your cloud apps in the Cloud app launcher, then press the Enter key to automatically launch them. If you want to launch the cloud app from Windows File Explorer, you can do so by opening the shortcut. - GPU accelerated: CloudyDock can use the GPU acceleration of the GPU hardware you are using, so it will be much faster than using the CPU. - Configure shortcuts: You can add custom shortcuts to any cloud app. - Create a shortcut to your cloud app: You can add a shortcut to any cloud app, you can add a shortcut to cloud apps which do not have a shortcut by right-clicking the cloud app in the Cloud app launcher. - Launch cloud apps directly: You can directly open any cloud app without opening the Cloud app launcher first. CloudyDock is a free cloud-based application launcher, designed to run Windows applications in the cloud instead of on your computer. It will be easy to find the applications you want, launch them, and dismiss them all. You can define as many shortcuts for the cloud apps as you like, and easily switch between them by using hotkeys. You can also
