[caption id="attachment_2117" align="alignleft" width="30%" caption="WeakAuras Companion Description" align="alignleft"/>
WeakAuras Companion provides a customizable interface for displaying buffs and debuffs, along with identifying the statuses for each of them. In addition to that, this tool allows you to easily manage the visual configuration of your Wago.io account.
WeakAuras Companion Setup; [caption id="attachment_2118" align="alignleft" width="30%" caption="WeakAuras Companion Setup" align="alignleft"/>
In order to use WeakAuras Companion, you need to have a World of Warcraft folder, and Add-ons installed from the game launcher. In addition to that, you need to provide your API key, and a Wago.io username. [caption id="attachment_2120" align="alignleft" width="30%" caption="WeakAuras Companion Setup" align="alignleft"/>
Using the Visual Wizard, users will be able to configure a list of buffs and debuffs, and provide a visual style that will be applied to each. The backend part of the tool is WebSocket based, and as such, should work everywhere, as it does not require Flash, Java, or any such plugins. WeakAuras Companion Crack+ License Keygen

WeakAuras Companion is a framework designed to display auras on-screen, either through a simple desktop, or through a customized interface. While the module has grown considerably since its initial version, it still has a few tricks up its sleeve. Core functionality: - The user is notified of any buffs that affect them, and of any changes in their status, abilities, position, or targets. - The user can activate and deactivate auras, which are displayed directly on-screen. - A simple stats view allows the user to check their various statistics while auras are being displayed. - A "blink" button is provided for switching between two groups of auras. - A "Magic" button allows the user to switch between two types of auras. - A "Hide" button is provided to hide auras in battle. - A "Hide all" button is provided to hide all auras, either for all users, or for just a single user. - A "Reset UI" button is provided to reset the entire interface to default settings, such as the update frequency, or the type of notifications to be displayed. - A "Exit" button is provided to exit the application, when running in desktop mode only. - Besides the UI, a sidebar is provided for user configuration. Optional features: - A "Status" button is provided to display the user's currently active buffs, and the number of each type. - A "Target" button is provided to display the number of players or targets on-screen, and optionally take into account the user's current target. - A "Warning" button is provided to display a warning when using an aura with a long duration. - A "Status" button is provided to display the user's status. - A "Details" button is provided to display a detailed status of the user and their targets. - A "Spell Overrides" button is provided to enable the display of buffs, debuffs, status, and abilities. The button is disabled by default, and can be enabled by the user. - A "Show WeakAuras UI" button is provided to toggle the display of the user's auras on-screen. - A "Group" button is provided to group auras of the same type, for example "statuses" and "debuffs". - A "Generic" button is provided to show auras that do not have any special name

What's New in the?

----- WeakAuras Companion uses the WeakAuras framework, creating a set of auras which trigger as you gain experience, gain loot, or gain gold. By using WeakAuras Companion, you can use the features of the former to create your own auras. WeakAuras Companion aims to integrate with Wago.io, as such it can notify you with alerts when auras and skills are updated. WeakAuras Companion does not provide you with a separate visualization for each of your auras and effects, instead it shows you a single UI and allows you to easily access all the information at any time. WeakAuras Companion Features ----- ■ Currently implemented: • Currently implemented features are: + Skill timer/exp (only for exceptional skills, you can gain experience through skills just fine) + Loot timer (Only present on items) + Gold acquisition (Present on monsters) • In the future: + Add extra interface for more notification features (constantly updated and fetched from our server) • Currently supported: + A lot of interface: ** Ability to be setup with skills of all classes and faction. ** Ability to display the name of the target the aura is applied to. ** Ability to display the type of the aura ** Ability to display the damage done and incoming healing done by auras (works only on exceptional auras) ** Ability to display the current level of the target the aura is applied to. ** Ability to display the current health of the target the aura is applied to. ** Ability to display the current dodge, block, and parry of the target the aura is applied to. ** Ability to display any currently ongoing spell id's. ** Ability to display any currently ongoing buff id's. ** Ability to display any currently ongoing debuff id's. ** Ability to display the weakest player of a dungeon or raid. • Ability to show the raid members, just click on the name of the member and WeakAuras will display the relevant information of that member. • Ability to show the dungeon members, just click on the name of the member and WeakAuras will display the relevant information of that member. • Ability to show the FFA members, just click on the name of the member and WeakAuras will display the relevant information
