Microsoft OneDrive app rolled out OneDrive users who are on Windows 7 PCs will be getting a new option on the desktop app. Share this article Microsoft OneDrive users who are on Windows 7 PCs will be getting a new option on the desktop app. The company says that the new option will enable users to change and edit text in documents on OneDrive. The new feature, dubbed the 'Edit' option, can be accessed from any application that uses rich text, PDF files or internet files that use the .txt extension. You can access the options via the 'More' option in the app's 'Home' window. Users can also download the file onto their computer and then edit it using a different application or program. For instance, it can be edited with Word, or it can be opened in Microsoft Word, Microsoft Powerpoint, or Excel. This new feature is being rolled out gradually to Windows 7 users. To check if it's working on your computer, follow these steps. Open the OneDrive app. Tap the three dots button ( ) next to the ' d0c515b9f4
