I have this object in array: var f = ['hello', 'goodbye', 'world']; I want to add a new word to the array. I used push() method: f.push('test'); But I checked my array with console.log() method and it did not contain test. Can anybody tell me why? EDIT: Thanks for your responses, but I really don't understand. A: The push method adds a new item to the Array. The item you put into the array via f.push('test') is not visible anymore. (Another had been forced to sign a statement saying he was not abused
