A: The "X FORCE keygen" you see refers to the Autodesk 2011 x-force product: It's a free tool that can be downloaded from the Autodesk website. It lets you convert free CAD models into X-Force compliant versions (which you have to pay for) by correcting "custom properties" (such as number of faces and number of vertices). The resulting X-Force compliant model can then be viewed with the 3D Viewer and used in the product platform (autocad, 3ds Max, solidworks)

Q: Php unserialize seems to work, but i get empty array This is my POST data: Array ([userID] => 46 [userName] => John Smith [userImage] => John Smith image [userBio] => John Smith bio)

This is how I create the array: `$userData = unserialize(file_get_contents('user.txt'))`; file.txt:
Array ([46] => Array ([userID] => 46
[userName] => John Smith [userImage] => John
Smith image [userBio] => John Smith bio)) But
what I get instead of an Array is a Array-object.
And when I do an `echo $userData`, it returns a
string: Array ([46] => Array ([userID] => 46
[userName] => John Smith [userImage] => John
Smith image [userBio] => John Smith bio)) Why
does unserialize make it string d0c515b9f4
