The technology is available in Career Mode, in which players can play as their favourite team, and in online multiplayer, where gamers can compete in a variety of game types. FIFA 22 will be available on 27th September 2017 for PlayStation4 and Xbox One, with PC versions releasing at a later date. The game will be available in retail stores, digital stores, and on PlayStation and Xbox digital platforms. In Career Mode, players can progress through a league, complete bonus matches and other contests, learn new attributes, and master new skills to become the best football star in the world. The game is also packed with new features and modes including the FIFA Ultimate Team, a new Club Friendlies, Amitiés, and Stages. Skill ceiling, power shots, and subtle movements all result in increased game difficulty, but so do the new features, including the introduction of new ways to score. Players can now perform a fast-paced 1-on-1 counter with an opponent to give an easy counter or complete an audacious flanking run to set up a killer close-range strike. FIFA 22 introduces a new pass progression, more passing options and new ball control to help deliver it. Players are able to provide more threatening play and give team-mates a

variety of useful touches, like balls that move more like a Frisbee and hit targets. The new ball animation system is more responsive, and can be switched between the 1, 2, and 3-point shots, giving gamers more options and a greater variety of goals. In offline games, play is created from a randomised loadout of boots, gloves, and shirts, and FIFA Ultimate Team packs. New power ratings can be earned and equipped against the opposition. FIFA 22 introduces a new momentum-based goalkeepers AI, which responds to decisions and positioning during the match to better make key saves. The goalkeeper AI can be managed using the new Video Editor, which can be used to remove save animations, as well as effects like the goalkeeper sinking to his knees after a save. As a presenter of FIFA Soccer, Darrelle has been producing media content for EA SPORTS for many years; including over 75 FIFA Xbox 360 and FIFA PS3 game and Official FIFA Website video spots. He will be joined by a host of football stars on this FIFA journey to celebrate the biggest sport

Traction gives the goalkeeper a direct influence on the trajectory of the ball to keep it from being fired on goal. By applying Traction in the right situations, it is now possible to repel a shot on goal. This change will make defending more difficult and force players to make more important decisions on the ball. New Ways to**
